About This Game

Story:

In a dystopian city of the future, lives a superhero - Music Boy.
The only one way to save the residents and the city is to play the real music.

Game features:

1. Press the buttons to the rhythm of the song

This is just so fun!

2. Accuracy

The game uses MBOY rhythm maps. This ensures accuracy and a perfect hit of the notes in the rhythm.

3. Built-in editor

The game has an editor for creating MBOY rhythm maps. This allows you to create custom tracks and use your own music for

it. The editor supports MP3, OGG and WAV audio file formats.

4. Random generation

The environment and music notes are randomly generated, each time the level looks different.

5. Head tracking

The game uses a webcam to track the head movements. You can move the head to the beat of the music during the game and receive extra points.

6. Slow motion

You are allowed to slow down the time to be more precise and collect more notes.

7. Different game modes

Different mode offers a different camera position – back, top and front. Choose the mode that best suits the music.

8. Any genre of music

The game contains and supports tracks in different genres such as Rock, Electronic, Pop, and others.

9. Workshop support

Create your track and share with the community. Download ready to play tracks from other players.

Download new tracks from Workshop!

I'm considering lying down and reflecting on my entire life after playing through this game...! Beautiful writing and a story that jerks you in many different directions during its ~6 hour runtime. Interesting characters with plenty of depth and a stark commentary on the realness of privilege, suffering and crushing debt. I don't want to give much more away, but this is 100% worth your time.. I am a huge HOG fan but this game was not a very good one. It was the first time I actually requested a refund for a hog game. The voice overs are terrible and the graphics are pixelated on wide screen. Also for me it's just not a fun game with a good story line. I don't recommend this game despite the other flood of positive reviews but try it for yourself and see if you want to take the chance. I did give it a fair half hour gameplay to see if it would get better but by part two I could not take anymore.. Cool graphics

+Decent controls

+Great concept

+Kind of funny

-Only one minigame that isn't extremely lazy

-Making fun of devs that are better

-SHORT

-I can only recommend it because of how fast it downloads and that it's over quickly

-Jiggly achievement doesn't work considering I was getting jiggly the entire credits.

. Good art style, very amusing music, shorter than a middle school relationship.

Its Stanley Parable, with less self-reference jokes, (its also not as smart as Stanley Parable, but that doesn't matter.) more charm, and an amazingly whimsical soundtrack.

If you got 5 mins to spend to get a little cute story every so often, its hard to go wrong.
I just really hate how navigation works.

8/10

I found a bug where, if you try to create a shortcut to this game, the shortcut comes up null.

Otherwise it works as written. A great and fun game. A mix of team play with towerdefnse. Do expect few play rooms on each game but it's still fun to play with old and new rookie and pros. Also it's real fun when you send yoru friend a nice ground zero or a head crab.. Pretty fun platformer from a simpler time. Won't take you long to beat and it is relatively linear although there are a few parts of the game where you're asking, "What am I supposed to do here exactly?" The game has some memorable levels but for the most part it isn't gorgeous. The replay value won't be high but for someone looking for a goofy game to relax and enjoy it isn't a bad choice. I enjoyed it as a kid and I enjoyed it this time through as well.. lief simulator pretty accurate

and jokes on you devs i jacked off to dad. crashed everytie treid to play games trash. for a simulator to be good it needs two things outstanding graphics and good physics this game lacks both. Doodle God is a popular mobile game. You match elements and items to create new ones. Although that seems simple the game is actually quite witty and advanced. It really helps to pass the time while waiting in line, taking transit or countless other times you are in your phone.

But what is nice is you can now play the game on your PC. It's really stunning. You can easily switch between your device and the app via the upload option. Don't lose track and keep making new things!

Don't want micro transactions? Don't rush the game and buy hints. Google also provides free hints if you are that rushing kinda person. :P

The PC version really has a lot more animation, mode and levels to it than the mobile one. Easter mode? Halloween? Santa

mission? You will easily pass the time clicking away on these things.

I would recommend this game for anyone looking for a fun, puzzle clicking type game.

If you like Bejeweled this game is for you. It is cute and easy to learn with new challenges every step of the way. At the same time you get to build a small town/village and unlock minigames. Building the wonders is more complicated than I thought during my first Wonder. It is not just click on anything and be done with it. One achievement was to complete a Wonder in seven levels. This could only be achieved with some consideration as to where I would put my resources. Adding one piece of the Wonder unlocks other positions. Figuring out which will be unlocked is crucial to be aware of to not waste a round by still having resources on hand. If it had been more advanced with this I would have enjoyed the game a whole lot more! It felt like a small tease. If the developers had built the game around the resources and the building of Wonders, making a demand for the player to be considerate about the placements, this game would have been so much better.

Even so I recommend it for all my fellow Bejeweled-players out there. 7 Wonders is a nice variant of the classic game and should be played.. I wasn't expecting much, but this would be terrible even if it were a \$1 mobile game.. Masterpiece 5/7. this game is very addicting and fun. You have to survive until the end of each level with scarce resources (especially weapons/ammo) and very little in the way of health. Stealth seems to be the more successful way to play although going all out and attacking is immensely fun. Characters are cute. This is one of those games that is hard and frustrating but you just can't help coming back to over and over to try that level one more time.. very excited for the new thanos dlc. Haha love this game! If you have a computer and a friend, this is perfect. Great for parties!. a rilly mellow game for having weird feelings in don't get it if you're not willing to spend ten bucks on something odd and brief, but if you are, do
