best looking skin out the dlc's. Lara looks like a professional raider in this skin.. DLC verdict: Don't get it OR Get it in the bundle with the base game Comment: It is just a new skin which you can change at the camp fires. However, it does not reflect the injuries Lara receives (unlike her default skin) so it is very immersion breaking. But it is part of the GOTY edition so you could get this through buying that version. ----- If you liked this DLC review you can find more in my Review Corner .. This reminds me of Alan Wake, looking for treasures in ghostly tombs.. I wanted Lara Croft in a cool jacket. I got Lara Croft in a cool jacket. It's exactly what it seems to be, and while the outfit remains undamaged throughout the story mode, I didn't notice this as an issue because all dirt, grime, blood and injuries sustained over the story are in effect anyways. Not the best investment in the world, obviously, but a neat little cosmetic something that's pretty well done.. Given some of the cold locations in this game I'm sure Lara would appreciate a jacket however given this is just a game it is purely a pointless visual change. Also this outfit does not get damaged as the game progresses in the way the default
